THE VUE DOOR

EXPERIENCE

Stella has been working with glass products for over 15 years. We've produced hundreds of panels for high-end homes, high rises, commercial balconies, amenity spaces, schools, and restaurants.

Established in 2001, our focus has always been quality glazing products and glazing contractor support.

A North American made product means quick access to parts and technical support.

SUPPORT

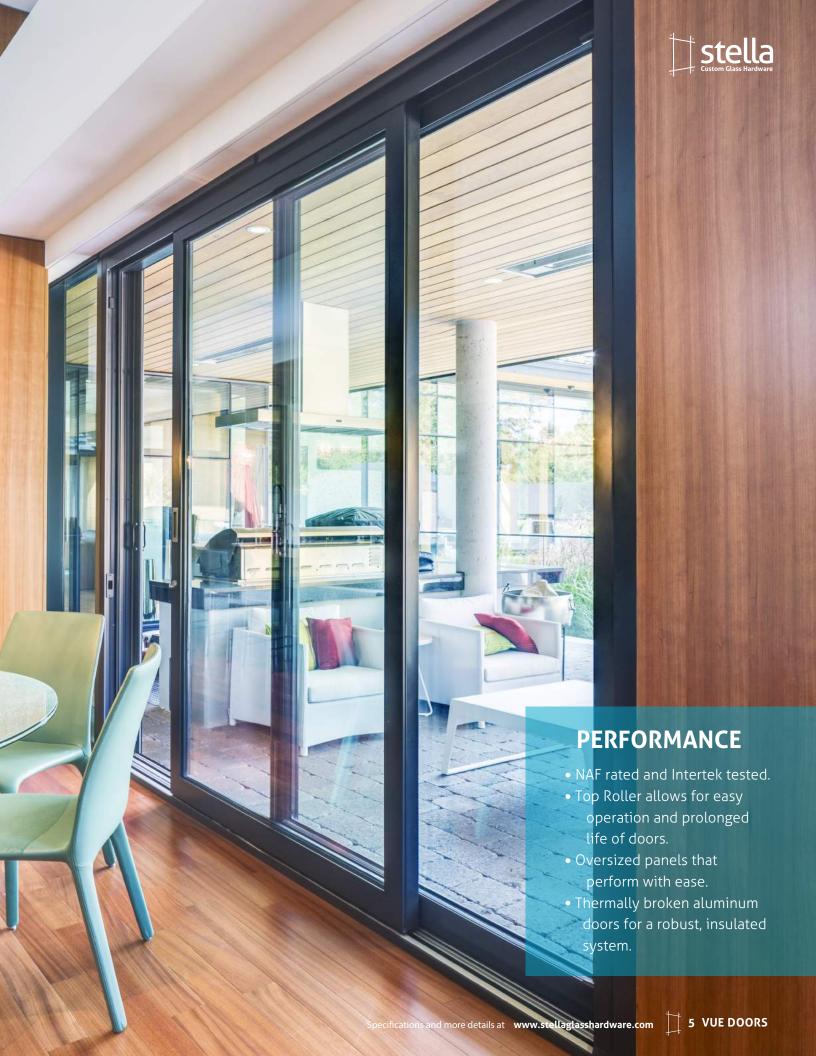

- Local shop for technical support
- 10 year hardware warranty
- Installer training for best results.
- Technical team to help design custom configurations.

DESIGN

- Multiple configurations for corner doors, pockets and tailor made solutions.
- Colour options to suit all projects.
- Quality stainless steel rollers, hinges and handles.

- Sizable Thermal Struts
- No Empty Cavities Added insulation within voids of door profiles.

SECURITY

Convenient Locking
 Twin point locks secure with twist of a handle.

LONGEVITY & QUALITY

- Structural Stability
- Weather Resistant
- Corrosion Resistant
- Quality made in Canada

NAFS PERFORMANCE

Full test results available upon request.

BI-FOLDING DOOR SYSTEMS

SIZING

Up to 16,256mm [53ft] wide x 3050mm [10ft] high.

O TOP HUNG FOR EASE OF USE

• The weight of our bi-folding door is hung from above, so the door will be easy to use year after year. Typical bi-folding panel weight is 80 to 100 kg each with double glazing. Contact us and we can confirm your panel weight.

NUMBER OF PANELS

• Our Bi-folding door panels can go 1,016mm [40"] wide and 3,048mm [120"] high. Calculate the minimum number of door panels by dividing opening width by 1,016mm [40"] and round up. We will confirm with you if the number of panels is within the limit.

SILL CHOICE

- 1. WEATHERDEFENCE PLUS: Stella Original Design. Best weather protection with integrated drainage system
- 2. ACCESSIBLE: ADA Approved. Smooth Transition on sill ensures no barriers for wheelchairs or walkers.

3. FLUSH FLOOR: Best for interior applications, sill disappears into floor.

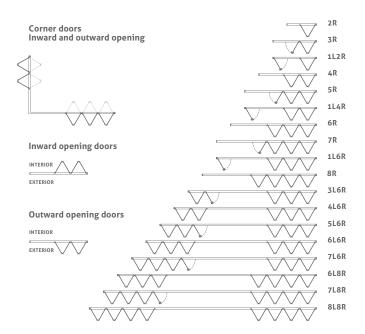

OPENING CONFIGURATIONS

- towards the interior (inward) or outwards towards the exterior (outward). Then and number of panels to stack right.
- for you. We also do corner doors and angles other than 90 degrees may also be available.

BF2 Bi-folding Door, Maxshoud Residence (Vancouver, 2010)

OPENING CONFIGURATIONS

HARDWARE AND FINISHING OPTIONS

O GLASS SPECIFICATION

 The BF2 door is supplied without glass. It is designed to receive a standard 5mm/5mm sealed unit 25.4mm [1"] thick. We also offer triple glazed systems for improved thermal performance. Contact us for details.

THERMAL PERFORMANCE

 The BF2 door is thermally broken and double glazed units can achieve an overall U value ≤ 1.8W/m² * °K using readily available low E coatings. Contact us for triple glazed options and other details.

HARDWARE

 All VUE doors are secured with a sleek stainless steel twin point locking solution.
 A simple twist of the handle engages two drop bolts into the frame. The D handle offers a convenient grip to guide the door to the desired position while opening and closing VUE doors. Stainless steel carrier and hinge hardware sets which are visible, are supplied in brushed stainless (standard) and PVD Dark Bronze (as an option).

NAFS Rated

- The BF2 door with Weatherdefence Plus Sill is NAFS rated CW-PG40.
 - We provide NAFS label on standard size Weatherdefence Plus Sill Bi-folding doors.
 - The door achieves water resistance of 400 Pa and a design pressure of +/-1915 Pa. Contact us for details or test reports.

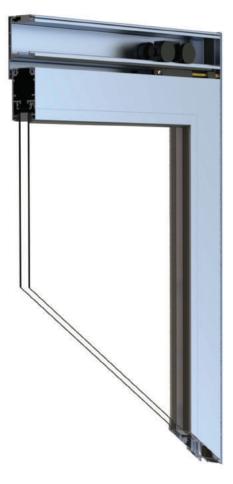

TS2 SLIDING DOOR SYSTEMS

O SIZING

Up to 14,630 mm [53ft] wide x 3657 mm [12ft] high in up to systems of one to four tracks.

O TOP HUNG FOR EASE OF USE

 The weight of our sliding door is hung from above, so the door will be easy to use year after year. Contact us and we will confirm your panel weight.

NUMBER OF PANELS

Our sliding door panels can be up to 1,830 mm [72"] wide and 3,660 mm [144"] high. Calculate the minimum number of door panels by dividing opening width by 1830 mm [72"] and round up. We will confirm with you if the number of panels is within the limit.

SILL CHOICE

- 1. WEATHERDEFENCE PLUS: Stella Original Design. Best weather protection with integrated drainage system and minimal profile.
- 2. ACCESSIBLE: Approved. Smooth Transition on sill ensures no barriers for wheelchairs or walkers.

Does not meet NAFS performance requirement

3. FLUSH FLOOR: Best for interior applications, sill disappears into floor.

Does not meet NAFS performance requirements.

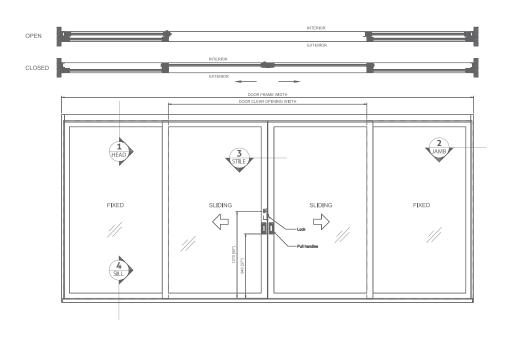

OPENING CONFIGURATIONS

- Decide where you want fixed panels and whether the door open in the middle, from one side, or a pocket for the door to slide into. Up to 8 panels can be supplied in a 4-track system.
- Don't know what layout? We will recommend the best configurations for you. We also do corner and angles other than 90 degrees may also be available.

TS2 Sliding Door, One Pacific (Vancouver, 2016)

GLASS SPECIFICATIONS

is designed to receive a standard 6mm/6mm sealed unit 25.4mm [1"] thick. We also offer triple glazed systems for improved thermal performance. Contact us for details.

THERMAL PERFORMANCE

• Our TS2 is thermally broken and double ≤1.8W/m² * °K using readily available low E coatings. Contact us for triple glazed options and other details.

HARDWARE

• All VUE doors are secured with a sleek multi-point lock are available. Flush Bolts are provided to hold the door in place when

NAFS Rated

- The TS2 door with Weatherdefence Plus Sill is NAFS rated LC-PG35.
 - We provide NAFS label on standard size Weatherdefence Plus Sill sliding doors.

The door achieves water resistance of

• 400Pa (PG55) and a design pressure of +/- 1680Pa. Contact us for details or test reports.

REQUESTING A QUOTE

Have a project in mind? Let us know the basic details such as:

Frame Opening Size
 Configuration
 Finishing (painted or anodized)

This helps our team give you the most accurate pricing, or come see the doors in person, book an appointment and visit our showroom - we're happy to answer any questions - submit online at www.stellavuedoors.com!

O ORDER BOOKING

Moving forward with a VUE Product? Great! The next step is to confirm the following:

- Configuration (calculate panel size & weight).
- Sill Type (to confirm performance rating).
- Finish Type (let us know if you need samples).
- •Frame Size (required for Shop Drawings).
- Preferred Delivery Date (for scheduling).

Let us know if you require preliminary drawings for your project. Please note that these details are required to move your product into production.

O PLACE ORDER (SHOP DRAWINGS AND ORDER CONFIRMATION)

Manufacturing usually takes 6-8 weeks from the sign off of the Shop Drawings (depending on the shop schedule). This will be confirmed at the time your order is placed. All orders are subject to 25% deposit & COD.

FABRICATION, FINISHING & ASSEMBLY

We will keep you up to date while your doors move through production. Our team will contact you a week before completion to schedule pick up and training.

O PICK UP, TRAINING & INSTALLATION

Stella requires installers to participate in a short install training session to be certified. Further assistance is always available.
