Mixed Metals - Pick Your Own Patina

Create more than a brushed finish.

Change our hardware's colour

with our durable alternative to paint and powder coat.

*Standard Finish -
Stainless Steel*

*Stella Spectrum -
Charcoal (Matte Black)*

STELLA SPECTRUM SERIES

Hard Ceramic Coating for Stainless Steel Hardware

FAQ

- **Why Stella Spectrum?**
 - Stella Spectrum coating is harder with better adhesion to stainless steel.
 - Stella Spectrum is significantly thinner (0.75 umm - 1.0 umm); threads stay operable even when coated
 - Other coatings, such as powder coating or paint, are prone to chipping
- **More info on Corrosion Resistancy?**
 - This coating protects the stainless steel from corrosive environments
 - Salt brine testing has been conducted with appropriate results
- **Comments on Stella Spectrum durability?**
 - It is very durable on impact, but may still show scratching if not handled with care
- **Colour Variability**
 - Some colour variation can be expected due to the application process
- **Lead Time**
 - In-stock Stella standard hardware - Lead time 3 to 4 weeks
 - Items not currently in stock - standard lead time 8 to 10 weeks plus Stella Spectrum adds 2 to 4 weeks; total time of 10 to 14 weeks from date of signed works order
- **Budget Pricing**
 - Depends on the size of the parts and the complexity of the hardware item
 - Estimated 15% to 50% on top of the order value for larger project
 - Smaller batches are more variable due to set-up charges
 - Contact us for specific pricing

Featured in November 2022 Canadian Architect Magazine

Stella Doc & Pin Hardware was supplied in Charcoal (matte black) to blend seamlessly in with black support posts on Ontario's Place Des Arts over-height glass guards.
